CONTROL STICK FUNCTION
The Nintendo® 64 Controller contains a CONTROL STICK which uses an analog system to read the angles and direction of its movement. This allows subtle control that is not possible using the conventional + CONTROL PAD. When turning the Control Deck power ON, do not move the CONTROL STICK from its neutral position on the controller.

If the CONTROL STICK is held at an angled position (as shown in the picture on the left) when the power is turned ON, this position will be set as neutral. This will cause games using the CONTROL STICK to operate incorrectly.

To reset the neutral position once the game has started, let go of the CONTROL STICK so it can return to its center position (as shown in the picture on the left) then press START while holding down the L and R BUTTONS. The CONTROL STICK is a precision instrument, make sure not to spill liquids or place any foreign objects into it.

LOADING
1. Make sure the power is OFF on your Nintendo® 64 Control Deck.
2. Insert your NFL Quarterback Club™ '99 Nintendo® 64 Game Pak into the Control Deck as described in the instruction manual.
3. Insert Controller into Controller Socket 1.
4. If you wish to save a game, insert a Nintendo Controller Pak (sold separately) in the slot on the bottom of the controller.
5. Slide the power switch to ON.
(Important: Make sure not to touch the Control Stick when doing so.)

- This game is compatible with the N64 Expansion Pak™. Before using the N64 Expansion Pak, please read the N64 Expansion Pak Instruction Booklet carefully as it contains important information about the safety and use of this accessory.
- N64 Game Paks displaying the N64 Expansion Pak icon will take advantage of the additional memory features of the N64 Expansion Pak. Look for this icon on specially designed games.

New Season Options
When New Season is selected, you will come to a screen where you may select certain season-specific options. To do so, highlight an option and press the A BUTTON. You’ll then go to the screen for that option.

Start Season Begin your new Season.
Pre-Season If you are the type of die-hard fan who wants all the Season action, you can even elect to play all the pre-season games, too, just by turning this option ON.
Player Development When turned ON, this feature tracks each player's performance in several categories during each game and rates them by how they did. Categories change to reflect the demands of each position. The rating is cumulative, and may result in a player improving (from good performances) or getting worse (from bad performances), though a certain amount of randomness keeps things interesting. This means each player (and consequently each team) brings variable skill levels into future games and seasons. In this way, some teams may be great for a few games or seasons then go into decline, while losing teams may begin to turn things around.
Quit Season Quit the current season without saving.
• Select New Season/Start Season to begin Season play from the top.
• To continue a saved season from where you left off, load it from the Save/Load screen. Enter NFL Play mode and select Continue Season.

In Season mode, you can play one or several games each week. The computer will simulate any games not marked for play. You can import a previously saved Created Team in place of a current NFL team.
To select Season games each week
• ↑ or ↓ to scroll weekly matchups.
• ← or → to move highlight to a particular matchup box or team select box.
• C ▼ to mark a highlighted matchup for play and/or select a team.
• A BUTTON to play games.

Note: If you press A without marking any matchups for play, you will be asked if you wish to have the computer simulate all games for that week. If you want to simulate successive weeks, just scroll to the week you want to simulate games up to and press the A BUTTON. The game will simulate every game up to that week.

PLAYOFFS
Playoffs features all the playoff levels from wild card all the way to the Super Bowl. If you revel in the pressure of must-win playoff games, you will love scaling this super-tough ladder to the top. While the computer determines the Playoff teams and ladder, you may import a Created Team into the 1st tier of the Playoffs.
You can play all games in the playoffs, play only the games featuring a particular team, or have the computer simulate games.
• Select New Playoffs at the NFL Play screen to begin a new playoffs series. Doing so will delete any previously started Playoffs from the internal RAM (NOT from your Controller Pak).
• Select Continue Playoffs to pick up a previously saved series from where you left off. This series must first be loaded at the Save/Load screen.

To select Playoff games
• ← or → to scroll playoff ladder.
• ↑or ↓ to move highlight to a particular matchup box.
• C ▼ to mark a highlighted matchup for play. The computer will simulate any matches not marked for play.
• A BUTTON to play games.

Note: If you press the A BUTTON without marking any matchups for play, you will be asked if you wish to have the computer simulate all games for that week.

To play all weeks with a particular team
• Highlight the box next to a particular team and press C ▼.
• A BUTTON to play games.

Following Playoff game selection, you will go to the Controller screen to select a team to control.
TOURNAMENT PLAY
Choose a 4, 8 or 16 team tournament. Select games for Tournament play as you would in Playoff mode, including importing Created Teams.

SIMULATIONS
Choose classic Historic simulations, including moments from all 32 Super Bowls or create your own tense Custom simulations.

To play an Historic simulation
- ← or → to cycle to the desired simulation. A BUTTON to select. Then it's right into play!

To create a Custom simulation
- Control Pad to highlight situational area (Quarter, time remaining, teams, etc.).
- L or R BUTTON to toggle settings.
- A BUTTON to confirm simulation and advance to the game set-up screen, where you set the weather, etc.

Note: In simulation mode, quarter length is 15 minutes.

PRACTICE
Practice mode allows you to perfect your offense (running, passing and kicking skills) before taking on a team in an actual game. In practice mode, there are no injuries, downs, time outs or time restraints.

Practice mode features the following options:
Offensive Team Bring in any NFL team to run plays with on the practice field.

Defensive Team Bring in any NFL team to run plays against on the practice field. The default is NONE.

Offensive Playbook Use the default playbook, or choose from any team specific playbook.

Starting Position Place your offensive team anywhere on the field.

GOAL TO GO!
The Coin Toss
Move the highlight to a choice and press the A BUTTON.
The Away team calls the toss in the air. The winner chooses to kick or receive, the loser chooses which goal to defend.

Kick Off
- Press the Z BUTTON to put the kicker in motion.
- Press ← or → Control Stick to aim kick.
- When the kick meter is full, press Z BUTTON again to kick the ball.
Follow the same procedure for punts, field goals, and extra points.

CALLING PLAYS
The play select screen is divided into 4 Defensive and 4 Offensive play calling boxes and a game status area showing the current game situation (down, yards to go, time remaining, etc.). If you have created a custom playbook, you can access it from this screen. In multiplayer games, the player with the lowest controller number controls the offense and the next lowest controls the defense.

To Call a play
- Scroll formations and plays using Control Stick ← or →.
- Press the appropriate control (B, A, C ▼ or C ▲) for the formation and play you wish to use.
- Press the R (shoulder) BUTTON to substitute in different play packages for Offense or Defense on the next play. After the play is completed, the package resets to Normal (default).

Offense Cycle among NORMAL, SPEED and POWER packages. Power subs in the strongest linemen and tight ends on the roster. Speed subs in the fastest backs and receivers on the roster.
Defense Cycle among NORMAL, NICKEL and DIME packages. Nickel subs in a defensive back for the middle linebacker. Dime subs in two defensive backs for the middle linebacker and the strong side linebacker.

Note: You can flip plays by pressing the Z BUTTON.
Once both teams have called plays, the teams break their huddle and go to the scrimmage line.

Using a Created Playbook
Once you have created and saved a custom playbook (see page 20), it will be available on your list of playbooks and can be used at anytime (excepting Quickplay) for any team.

To use a created playbook:
• Access In Game Options on the Game Setup screen.
• Scroll to either the Away Playbook or Home Playbook.
• Press ← or → on the CONTROL PAD/STICK to highlight the desired playbook.

CALLING HYPER AUDIBLES
Hyper Audibles allow you to quickly call a play at the line of scrimmage without specifying the formation. You simply input a three-button sequence for the play situation and the computer will automatically pick one of the many appropriate plays.

For example: a short run to the left would be input as A, A, A. A Pass fake from a punt formation to the middle would be C Â,C △, C ▼.

* Any button press is allowed on this tier; it does not affect the play called.
** Invalid input; hyper audible will be cleared.

For run, pass, field goal and punt Hyper Audibles, when a playbook search yields multiple play choices, one is chosen at random. Special plays (Kneel Down, Stop Clock) are only available to offense. The direction chosen in the last tier is the direction the players on the team will run to or defend (the ball direction is still controlled by the kickoff); the Sideline selections have no special effect.

Pass/Run Percentage You decide what percent of the time your offense will call a pass or run play (total is 100%) when you are not in an obvious passing situation (Ex.: 3rd down and 20 yards to go) or running situation (3rd down and 1 yard to go).

- ↑ or ↓ to scroll through available players, A BUTTON to select.

**COACHING TIPS & HINTS**
1. Follow the play diagrams, especially on running plays. If you don’t follow the pattern, you are liable to run smack into a defender—big trouble!
2. Take some time to master the controls for different play situations. Advanced players know that a juke or a spin or some timely turbo can make the difference between the goal line and a 4th down punt!
3. Become familiar with your entire roster. If a crucial player is injured, will you have a replacement in mind? Can you pick up a free agent replacement?
4. When controlling a receiver, wait until the last second before the ball arrives to press the catch buttons. Poor timing on a jump catch can lead to an incompletion or worse—an interception!
5. Make use of Audibles. When the clock is ticking and you find that your opponent has set up perfectly to ruin your play, sticking to the playbook won’t put you in the history books. Take some time to master your Hyper Audibles and you’ll gain an advantage.
